

Commercial Grade LED String Lights

Our commercial grade lights offer a heavy 20 gauge wire and a patented coaxial connection, allowing you to connect up to 125 twenty-five light strands on one plug, drawing only 2.3 amps! The coaxial connection provides a windproof and waterproof connection. There is no need to use electrical tape between strands to keep moisture out. The commercial grade lights are perfect for outdoor and commercial use and are offered in seven lens styles.

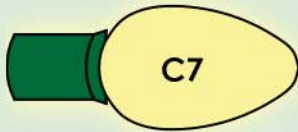

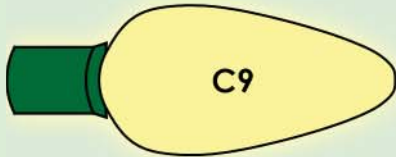

Style:	M5
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white, purple, pink
Description:	The M5 lens style is in the shape of a traditional mini light bulb. Traditionally used to decorate trees and other foliage (either in the limbs or as a trunk wrap), this versatile light style combines the benefits of LEDs with one of the most popular bulb sizes.
Bulb Size:	1" H x 1/8" W
Options:	25, 50, 100 light sets 4" or 6" spacing
Special:	Warm White available in green or white wire.

Style:	C6
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white, purple, pink
Description:	The smallest of the "strawberry" shaped lens styles, the C6 is a versatile bulb shape, suitable for decorating both greenery and some building applications. The lens is approximately 1 1/8" tall by 3/4" wide and is typically used in applications requiring more "pop" than provided by the smaller lens styles.
Bulb Size:	1 1/8" H x 3/4" W
Options:	25, 50, 100 light sets 4" or 6" spacing

Style:	C9
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white
Description:	The largest of the holiday lighting bulb styles and also used as a year-round decorative bulb, the C9 is "strawberry" shaped and approximately 2 1/2" long and 1 1/4" wide. Primarily used for building outlines, rooflines, and large trees, the C9 enables everything from an eye-catching holiday display to strategically placed decorative lighting ambiance. Look to this style throughout the year for a wide variety of lighting projects.
Bulb Size:	2 1/2" H x 1 1/4" W
Options:	25, 100 light sets 12" spacing

Commercial Grade LED String Lights

Style:	C7
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white, purple, pink
Description:	The C7 is the smaller of the two traditional "strawberry" shaped bulbs used for holiday decorating, the LED version is approximately 1 1/2" tall by 1" wide. This mainstay of holiday decorating is used to decorate larger trees, building outlines, and other custom applications. The versatile C7 is also used year round as a decorative lighting product as it can dress up everything from retail/commercial areas to special event venues.
Bulb Size:	1 1/2"H x 1"W
Options:	25 light sets 12" spacing

Style:	G25
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white, purple, pink
Description:	Primarily a decorative lighting lens shape, the G25 is a "gum-ball" round bulb approximately one inch in diameter. A great style for decorating special events venues like tents, as well as for dressing up patio areas and walkways. The G25 is a great alternative to traditional lens styles and can be used for short term decorating or year-round.
Bulb Size:	1" Diameter
Options:	25, 50, 100 light sets 6" or 8" spacing

Style:	G12
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white, purple, pink
Description:	The G12 lens style is a "raspberry" round shape, approximately one-half inch in diameter. It provides a decorative alternative to the mini light style and is used primarily to decorate trees and other foliage. Its round shape provides the ability to insert "berries" into trees or plants or just enables a slightly different lighting effect than either the M5 or conical lens styles.
Bulb Size:	1/2" Diameter
Options:	25, 50, 100 light sets 6" or 8" spacing

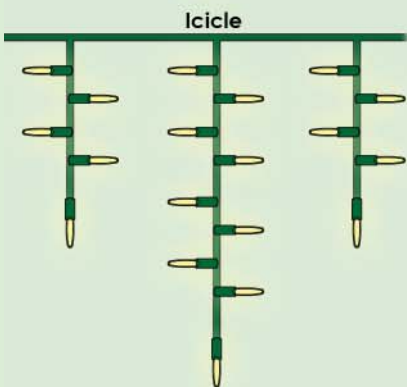

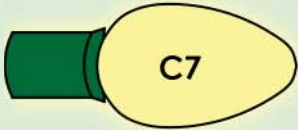

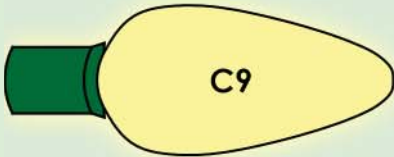

Style:	Conical
Colors:	Multi (red, orange, gold, green, blue), red, yellow, green, blue, warm white, pure white
Description:	This unique new lens style provides more of a sparkle effect previously only found with incandescent lighting. Each lens is a 5mm cone with an indented top to provide 180 degrees of light dispersion. A great style for decorating trees and other shrubbery, these strings will enhance any decorative or seasonal lighting display for years to come.
Bulb Size:	1/4"H x 3/8"W
Options:	25, 100 light sets

Commercial Grade LED String Light Accessories

Our commercial grade LED light strings utilize a unique, coaxial connector that not only provides for strain relief between strings but also resists moisture from entering string connections. In addition, these LED light strings are CSA(US) rated for up to 125 strings connected to a single power source. While the coaxial connectors enable end-to-end connections, often times there are lighting implementations that require spacing between light strings, other display options besides a single string of lights, or the ability to home run multiple runs back to a single power source. Our line of commercial grade LED light string accessories make all this possible.

Accessory:	Description:
<p>Power Adapter</p> 	<p>Sold separately from the light strings, the power adapter is required to connect at least one, and up to 125, commercial grade LED light strings to standard 120V power sources. It has a standard two-pronged polarized Edison style plug on one end and the coaxial-style connector on the other.</p> <ul style="list-style-type: none"> • Recommended maximum number of 25 bulb light strings connected: 125 • Recommended maximum number of 50 bulb light strings connected: 62 • Recommended maximum number of 100 bulb light strings connected: 31 • Maximum number of LEDs (bulbs) connected: 3,125 • Durable 18 gauge (AWG) wire • Available in green only
<p>Spacers</p>	<p>In many decorative and seasonal lighting applications, it is desirable to have the ability to insert a space between light strings or at the beginning of a run between the power source and where the lights begin. We provide three sizes of plain wire spacers with coaxial connections on each end that allow power to continue along a run where lights are not necessary.</p> <ul style="list-style-type: none"> • Available in 12, 20, and 50 foot lengths • Durable 18 gauge (AWG) wire
<p>8-Way Power Tap</p> 	<p>The 8-Way power tap provides a single power input and seven connections for light strings. This versatile product can be utilized like the hub of a wheel, enabling the light strings to branch out from a single location like spokes. When combined with spacers, this product makes decorating a grove of trees or other closely grouped items extremely easy as it allows for 7 separate light string runs to be connected to a single power source (as long as maximum connection ratings are maintained).</p>
<p>"T" Power Tap</p> 	<p>The "T" tap provides a single power input and two connections for light strings. Shaped like the letter "T" it gives the ability to install two light string runs in different directions using only one connection to power.</p>
<p>"X" Power Tap</p> 	<p>The "X" tap provides a single power input and three connections for light string runs. Perfect for enabling multiple runs from a single location, it can be used in large trees or other foliage to avoid having to decorate with a single continuous run.</p>
<p>Drop Elbow Power Tap</p> 	<p>The Drop Elbow provides a single power connection and two light string connections. Unlike the other taps, this accessory's power connection is at a 90 degree angle from the light string connections, making it an excellent choice to use on building corners to run light strings along two sides of the structure.</p>
<p>Curtain/Icicle Assembly</p> 	<p>The curtain assembly provides a simple means to create a curtain of light strings. It provides a single power connection and 28 drop connections for light strings. Multiple assemblies may be interconnected for longer curtain implementations.</p> <ul style="list-style-type: none"> • 10' long • 4" drop spacing • 2" lead and tail • Durable 18 gauge (AWG) wire

Standard Grade LED String Lights

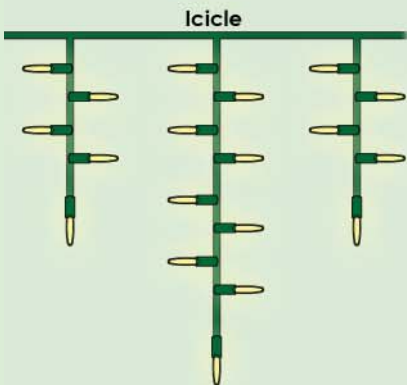

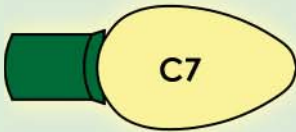

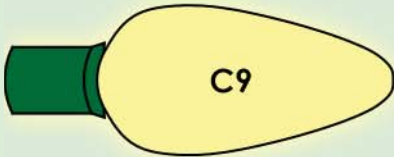

Style:	M5
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white, purple, pink
Description:	The M5 lens style is in the shape of a traditional mini light bulb. Traditionally used to decorate trees and other foliage (either in the limbs or as a trunk wrap), this versatile light style combines the benefits of LEDs with one of the most popular bulb sizes.
Bulb Size:	1" H x 1/8" W
Options:	25, 50, 100 light sets 4" or 6" spacing
Special:	Warm White available in green or white wire.

Style:	C6
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white, purple, pink
Description:	The smallest of the "strawberry" shaped lens styles, the C6 is a versatile bulb shape, suitable for decorating both greenery and some building applications. The lens is approximately 1 1/8" tall by 3/4" wide and is typically used in applications requiring more "pop" than provided by the smaller lens styles.
Bulb Size:	1 1/8" H x 3/4" W
Options:	35, 70 light sets 4" or 6" spacing

Style:	C9
Colors:	Multi (red, orange, gold, green, blue), red, green, blue, warm white, pure white
Description:	The largest of the holiday lighting bulb styles and also used as a year-round decorative bulb, the C9 is "strawberry" shaped and approximately 2 1/2" long and 1 1/4" wide. Look to this style throughout the year for a wide variety of lighting projects.
Bulb Size:	2 1/2" H x 1 1/4" W
Options:	25 light sets 8" spacing

Style:	C7
Colors:	Multi (red, orange, gold, green, blue), red, blue, warm white, pure white
Description:	The C7 is the smaller of the two traditional "strawberry" shaped bulbs used for holiday decorating, the LED version is approximately 1 1/2" tall by 1" wide. This mainstay of holiday decorating is used to decorate larger trees, building outlines, and other custom applications. The versatile C7 is also used year round as a decorative lighting product as it can dress up everything from retail/commercial areas to special event venues.
Bulb Size:	1 1/2" H x 1" W
Options:	25 light sets 8" spacing

Standard Grade LED String Lights

Style:	G25
Colors:	Multi (red, orange, gold, green, blue), red, green, blue, pure white
Description:	Primarily a decorative lighting lens shape, the G25 is a "gumball" round bulb approximately one inch in diameter. A great style for decorating special events venues like tents, as well as for dressing up patio areas and walkways. The G25 is a great alternative to traditional lens styles and can be used for short term decorating or year-round.
Bulb Size:	1" Diameter
Options:	25 light sets 6" or 8" spacing

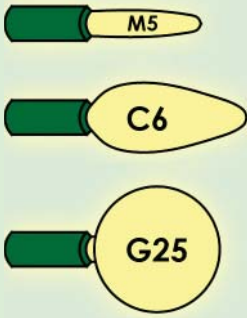

Style:	G12
Colors:	Multi (red, orange, gold, green, blue), red, orange, gold, green, blue, warm white, pure white, purple, pink
Description:	The G12 lens style is a "raspberry" round shape, approximately one-half inch in diameter. It provides a decorative alternative to the mini light style and is used primarily to decorate trees and other foliage. Its round shape provides the ability to insert "berries" into trees or plants or just enables a slightly different lighting effect than either the M5 or conical lens styles.
Bulb Size:	1/2" Diameter
Options:	35, 70 light sets 4" spacing

Style:	Snowflake
Colors:	blue, pure white
Description:	Snowflake-shaped bulb
Bulb Size:	1" H x 1 1/4" W
Options:	35 light sets

Style:	Star
Colors:	Multi (red, orange, gold, green, blue), red, blue, pure white
Description:	Star-shaped bulb
Bulb Size:	1 1/4" Diameter
Options:	35 light sets (pure white, blue, multi) 70 light sets (pure white, red, blue) 35 light sets

Style:	Icicle (M5 bulb, Icicle wire layout)
Colors:	Multi (red, orange, gold, green, blue), blue, warm white, pure white
Description:	The M5 style is just the bulbs along one constant wire, but the icicle style has a distinctive wire layout to simulate the look of icicles. Looks terrific along the gutter line of a home.
Bulb Size:	1" H x 1/8" W
Options:	70 light sets (7 1/2 ft long)

LED Colorwave

Style:	M5
Colors:	Blue - Pure White, Blue - Green, Blue - Gold, Red - Blue, Red - Green
Description:	The M5 lens style is in the shape of a traditional mini light bulb. Traditionally used to decorate trees and other foliage (either in the limbs or as a trunk wrap), this versatile light style combines the benefits of LEDs with one of the most popular bulb sizes.
Bulb Size:	1" H x 1/8" W
Options:	35 light sets (12.3 ft. long) 100 light sets (33.5 ft. long)

Style:	C6
Colors:	Blue - Green, Blue - Gold, Red - Blue, Red - Green
Description:	The smallest of the "strawberry" shaped lens styles, the C6 is a versatile bulb shape, suitable for decorating both greenery and some building applications. The lens is approximately 1 1/8" tall by 3/4" wide and is typically used in applications requiring more "pop" than provided by the smaller lens styles.

Options:	35 light sets (12 ft. long)

Style:	G25
Colors:	Blue - Green
Description:	Primarily a decorative lighting lens shape, the G25 is a "gumball" round bulb approximately one inch in diameter. A great style for decorating special events venues like tents, as well as for dressing up patio areas and walkways. The G25 is a great alternative to traditional lens styles and can be used for short term decorating or year-round.
Bulb Size:	1" Diameter
Options:	100 light sets (50 ft. long)

LED Ropelight

Style:	Ropelight
Colors:	Multi, red, gold, green, blue, warm white, pure white
Description:	Rope Light
Options:	20 ft., 30 ft., 140 ft., 150 ft.

LED Replacement Bulbs & Other

Replacement Bulbs:

Save energy and maintenance with the LED version of the traditional C7 or C9 screw-in bulb! These bulbs fit in the same sockets as their incandescent counterparts but use 85-90% less energy, last as much as 15 times longer, and resist breakage. Additionally, with LEDs, longer runs are possible due to their lower energy consumption, simplifying and speeding up your decorating.

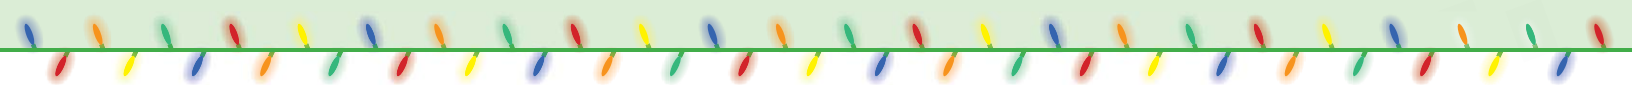

Available for C7 and C9 styles in colors: red, orange, gold, green, blue, warm white, and pure white.

Greenery:

We offer a variety of unlit and prelit greenery. Trees, wreaths, and garlands can be ordered pre-lit with incandescent or LED lights in a variety of sizes.

Incandescent Lights:

We offer a full array of incandescent mini lights, C7, and C9 stringers and replacement bulbs and rope lighting.
